Sk. Kamruzzaman

Work Experience

Questtag Inc, New York
http://www.questtag.com

Jan 2014 - Nov 2016

Back End
- Develop Rest Api using *java* and *play framework*.
- Design and Maintain Production Database in *mysql*.
- Co-ordinate with Mobile and Browser clients.
- End-to-End Testing and Quality Assurance.
- Create Documentation for both public and internal use.

Front End
- Implement Api consumption module in *jquery*.
- Develop Application, Data manager & Adapter module.

Projects

Questtag delivery solution at Questtag Inc
https://dashboard.questtag.com

- QT dashboard features.(http://www.questtag.com/features/)

Build Systems
**https://git.io/v15lc(mvn), https://git.io/v15lW(sbt)
https://git.io/v15l4(js)**

- Use of **maven** with **JAX-RX** & **JPA**.
- Use of **sbt** with **Play** & **Ebean**..
- Build system using **node** and **jake**

Web API Security
https://git.io/v15lO

- Use of **JAX-RX security context**.
- Implementation of **BASIC AUTH** and **JWT**.

Weather Application
https://git.io/v15lR

- Display temperature and current local time based on city.
- Use of **react.js** and **flux** architecture.
- Testing **flux** using **jasmine**.

Silent
http://bit.ly/2he7hd5

- Turn mobile silent based on predefined time and **geofence**.
- Use of **gradle**.

Lets go
http://bit.ly/2hwlipz

- List nearby places based on users location and preference
- Use of **node-express-mongo** stack
- Use of **retrofit**,**android account** & **google map**

About Me

Highly dependable Software Engineer and enthusiastic team player dedicated to streamlining processes and efficiently resolving project issues. Capable of applying design patterns to solve real world problems. Strongly motivated to use decoupled design architecture.

Education

2015 –	**Bachelor of Science**
	Computer Science and Engineering
	Bangladesh University of Engineering and Technology
	CGPA: 3.00/4

Language Skill

Basic Knowledge	C family of language, LaTeX HTML & css
Intermediate Knowledge	java, javascript, Shell script, php, SQL

ToolS

Library & Framework	Maven, SBT, JAX-RX, JPA Node,Jake, React.js, Flux, Jasmine. Laravel, Play Android, Unity
Others	Nginx, Apache, Tomcat Amazon AWS.

Principles

Clean Code.
Reliable and Reproducible Build System.
Feedback Loop.
Self testing Code base.
Separation of Concerns.
